Md Mojammil

Data Science & Process Automation Engineer

mohdmojammil3@gmail.com 8210979611 Munger, Bihar YouTube LinkedIn

Profile Summary

Data Science professional & Process Automation Engineer with experience in Python development, Data Analytics, Business Intelligence, SQL, and workflow automation. Currently working at Fusion Finance, developing automated reporting solutions, MIS reports, Power BI dashboards, and data-driven applications that improve operational efficiency and provide actionable business insights.
Skilled in Python, SQL, Power BI, DAX Query, Advanced Excel, API integrations, ETL processes, and cloud-based automation solutions. Experienced in building end-to-end reporting systems, automating business workflows, developing data pipelines, and delivering insights through interactive dashboards.
Knowledgeable in Machine Learning, Generative AI, AWS Cloud, and CI/CD practices, with a strong focus on leveraging data and automation to solve business problems.

Professional Experience

Process Automation Engineer, *Fusion Finance Pvt. Ltd.* 02/2026 – Present
Gurgaon, Haryana

- Developed, maintained and automated the MIS reporting and business process workflows using Python, SQL, Power BI, and Power Automate.
- Built and deployed Power BI dashboards and KPI reports to support data-driven decision-making across business teams.
- Automated data extraction, transformation, and report distribution processes, reducing manual effort and improving operational efficiency.
- Integrated APIs, databases, and cloud services to streamline reporting and business operations.
- Analyzed business data and generated insights to support performance monitoring and strategic initiatives.

Desktop Support Engineer | Tech Mahindra, *(Payroll: Taltech Technology Pvt. Ltd.)* 07/2025 – 01/2026
NSEZ, Noida, U.P.

- Provided desktop and IT support for end users, resolving hardware, software, and system-related issues.
- Prepared MIS reports using Advanced Excel (Pivot Tables, VLOOKUP/XLOOKUP) to track ticket resolution, IT assets, and team performance.
- Maintained IT asset inventory records, ensuring accurate tracking, allocation, and compliance.
- Coordinated with vendors and internal teams for asset procurement, maintenance, and issue resolution.

Machine Learning Engineer Intern, *iNeuron Intelligence Pvt. Ltd.* 05/2024 – 08/2024
Bangalore, Karnataka

- Conducted EDA, feature engineering, and ML model development using Python.
- Built and deployed ML applications using Flask/FastAPI on AWS.
- Implemented CI/CD automation using GitHub Actions and AWS CodePipeline.

Education & Certifications

Full Stack Data Science Master, *iNeuron Intelligence Pvt. Ltd., Bangalore* 05/2023 – 05/2024

Python, *IITM Pravartak* 08/2023

B.Tech, *Integral University, Lucknow* 11/2019

Technical Skills

Python & Data
Pandas · NumPy · Matplotlib · Data wrangling · EDA · Feature engineering · ML model development

AI & Frameworks
OpenCV (Computer Vision) · NLTK · spaCy (NLP) · Hugging Face Transformers · LangChain · GenAI & LLMs

Cloud & DevOps
AWS (EC2, S3, Elastic Beanstalk, CodePipeline, RedShift, Glue, Athena) · Git · GitHub · GitHub Actions · CI/CD, Basics Azure Cloud

Automation Tools
MS Power Automate, Zapier, N8N

ML & MLOps
scikit-learn · TensorFlow · Keras · ML Pipelines · Hyperparameter tuning · Model deployment · Production monitoring

Data & Reporting
Advanced Excel (Pivot, VLOOKUP/XLOOKUP) · Power BI (Data Modeling, Dashboard Development, DAX, Power Query, Report Automation)

Backend & APIs
Flask API, FastAPI, REST APIs

Database
SQL · MySQL · PySQL · MongoDB

Key Projects

Power BI WhatsApp Report Automation, *Fusion Finance Pvt. Ltd.*
Technologies: Python, SQL, Power BI REST API, AWS S3, Karix WhatsApp API.
- Developed an automated reporting solution to deliver Power BI reports directly to stakeholders via WhatsApp.
- Automated Power BI dataset refreshes and report exports using Python and Power BI REST APIs.
- Integrated SQL, AWS S3, and Karix WhatsApp API to enable end-to-end report distribution.
- Reduced manual reporting effort and enabled automated hourly KPI delivery with monitoring and logging.

Automated MIS Email Reporting System, *Fusion Finance Pvt. Ltd.*
- Developed automated workflows using Microsoft Power Automate to schedule and distribute MIS reports.
- Integrated SQL and Excel data sources to fetch reporting data and generate email-ready summaries.
- Automated report delivery using Outlook connectors and distribution lists.
- Reduced manual effort and improved reporting consistency through scheduled workflows.

Flight Fare Prediction ↗, *iNeuron Internship*
Technologies: Python, Scikit-learn, Flask, FastAPI, AWS Elastic Beanstalk, GitHub Actions, AWS CodePipeline.
- Developed a machine learning model to predict flight fares using data preprocessing, feature engineering, and model training techniques.
- Built REST APIs using Flask/FastAPI and deployed the application on AWS Elastic Beanstalk.
- Implemented CI/CD automation using GitHub Actions and AWS CodePipeline.

Declaration

I hereby declare that the details furnished above are true and correct to the best of my knowledge.
